REMARKS

In the March 24, 2005 *Quayle* Office Action, the Examiner noted that all pending claims 1-8 are in condition for allowance, but raised the following formal matters:

1. The oath/declaration is defective;
2. The Drawings are objected to because they include reference signs not mentioned in the specification ("14a" and "15a" in Fig. 2);
3. The Drawings are objected to because Figs. 14A, 14B, and 19-23 should be designated by a legend such as --Prior Art--;
4. The Drawings are objected to because in Fig. 20, reference sign 'G' should be designated 'G'" for consistency.
5. The specification is objected to because the title is not descriptive;
6. The specification is objected to because in line 8 on page 1, the date of the priority document should be corrected;
7. The specification is objected to because in lines 8-9 of claim 5, "said bottom magnetic core layer" should be changed to --said lower magnetic core layer-
- in order to more clearly refer back to lines 6 and 7 of claim 5.

Applicants respectfully respond as follows:

1. Applicants have attached hereto a new declaration to replace the defective declaration. The objection to the declaration is now moot.
2. Applicants have amended the drawings as described above on page 3. The objections to the drawings are now moot.
3. Applicants have amended the title as set forth above on page 2. The objection to the title is now moot.
4. Applicants have amended claim 5 to in the manner suggested by the Examiner. Applicants respectfully submit that the objections to claim 5 are now moot.

Applicants respectfully submit that all formal matters raised by the Examiner have been corrected.

Respectfully submitted,
